

MEMBERS ONLY EVENT

An exclusive tour of the PACCAR Plant featuring Kenworth and DAF Trucks

Society of Automotive Engineers - Australasia 2019 Site Tour Series

PACCAR PLANT TOUR FEATURING **PACCAR** KENWORTH AND DAF TRUCKS **Australia**

SAE-A invites Members to join us for an exclusive tour of the PACCAR Plant in Bayswater, Victoria .

PACCAR Australia markets two premium brands: the heavy-duty Kenworth range and the award-winning DAF range.

Kenworth vehicles have been built at the Bayswater assembly facility since 1971. Today the Kenworth brand is the heavy-duty market leader and is sold throughout Australia, New Zealand and Papua New Guinea.

The company also assembles and imports DAF vehicles, one of Europe's leading brands of medium and heavy-duty trucks. These vehicles are produced at DAF's Leyland plant in England, delivering a broad product range suitable for Australian road conditions. PACCAR commenced assembling the DAF FTT CF85 model at the Bayswater plant in 2018.

Tour features include: application engineering, frame assembly line and paint, prime line, cab build line, cab trim line, final line and final test.

PLEASE NOTE: As PACCAR Australia operates in a very competitive environment a policy precludes tours of our facilities by anyone who is in any way involved with our competitors or their suppliers.

Tour numbers are limited to 6 places only so register now.
