

Papers in: SP-2023

Paper Number For more information, click on the Paper Number	Title
2006-01-0260	Digital Materials Methods for DPF Development
2006-01-0261	Measurement and Intra-Layer Modeling of Soot Density and Permeability in Wall-flow Filters
2006-01-0262	A 1D Unsteady Thermo-Fluid Dynamic Approach for the Simulation of the Hydrodynamics of Diesel Particulate Filters
2006-01-0263	Investigation of the Effect of DPF Loading and Passive Regeneration on Engine Performance and Emissions Using an Integrated System Simulation
2006-01-0264	Simulating the Soot Loading in Wall-flow DPF Using a Three-Dimensional Macroscopic Model
2006-01-0265	Multi-Dimensional Modeling and Simulation of Wall-Flow Diesel Particulate Filter During Loading and Regeneration
2006-01-0266	An Experimental and Computational Study of the Pressure Drop and Regeneration Characteristics of a Diesel Oxidation Catalyst and a Particulate Filter
2006-01-0465	Empirical and Theoretical Investigations of Active-flow Control on Diesel Engine After-treatment
2006-01-0466	An Experimental and Modeling Study of a Diesel Oxidation Catalyst and a Catalyzed Diesel Particulate Filter Using a 1-D 2-Layer Model
2006-01-0467	An Advanced 1D 2-Layer Catalyzed Diesel Particulate Filter Model to Simulate: Filtration by the Wall and Particulate Cake, Oxidation in the Wall and Particulate Cake by NO ₂ and O ₂ , and Regeneration by Heat Addition
2006-01-0468	Numerical Simulation of NO/NO ₂ /NH ₃ Reactions on SCR-Catalytic Converters: Model Development and Applications
2006-01-0469	A Combined 3D/Lumped Modeling Approach to Ammonia SCR After-Treatment Systems: Application to Mixer Designs
2006-01-0470	Modeling and Laboratory Studies for DeSO _x Characteristics of LNT
2006-01-0471	Development and Experimental Validation of a NO _x Trap Model for Diesel Exhaust
2006-01-0685	A NO _x Trap Study Using Fast Response Emission Analysers for Model Validation
2006-01-0686	Development and Application of a Lean NO _x Trap Model
2006-01-0687	Modelling Diesel Engine Combustion and NO _x Formation for Model Based Control and Simulation of Engine and Exhaust Aftertreatment Systems
2006-01-0688	Thermal Studies in the Exhaust Manifold of a Turbocharged V6 Diesel Engine Operating Under Steady-State Conditions
2006-01-0689	A Hybrid Framework for Modeling Aftertreatment Systems: A Diesel Oxidation Catalyst Application
2006-01-0690	Robust Parameter Estimation Algorithms for Nonlinear Aftertreatment Models
