

## Papers in: SP-2035

<b>Paper Number</b> For more information, click on the Paper Number	<b>Title</b>
<a href="#">2006-01-0894</a>	Optimized Power Cell Unit in IC Engine - Design for Light Weight and High Strength Piston and Connecting Rod
<a href="#">2006-01-0895</a>	Development of Pitting Resistant Steel for Gears
<a href="#">2006-01-0896</a>	Examination of Pitting Fatigue in Carburized Steels with Controlled Retained Austenite Fractions
<a href="#">2006-01-0897</a>	Development of New Microalloy Steel Grades for Lightweight Suspension Systems
<a href="#">2006-01-1213</a>	Very and Ultra High Strength Steels Based Tailored Welded Blanks: A Step Further Towards Crashworthiness Improvement
<a href="#">2006-01-1214</a>	A Comparative Examination of the Resistance Spot Welding Behavior of Two Advanced High Strength Steels
<a href="#">2006-01-1215</a>	Austenitic Stainless Steels for Automotive Structural Parts
<a href="#">2006-01-1216</a>	USILIGHT: A Cost-Effective Solution to Lighten Cars
<a href="#">2006-01-1430</a>	High Strain Rate Deformation Behavior of Advanced High Strength Steels for Automotive Applications
<a href="#">2006-01-1431</a>	Effect of Tempered Martensite Volume Fraction on Final Properties of Cold Rolled and Tempered Al TRIP Steel
<a href="#">2006-01-1432</a>	Grain Refinement in Hot Rolled Dual Phase Steels
<a href="#">2006-01-1433</a>	Shear Fracture in Advanced High Strength Steels
<a href="#">2006-01-1434</a>	Strain Rate Effects on Mechanical Stability of Retained Austenite in TRIP Sheet Steels
<a href="#">2006-01-1585</a>	Application of 590/780MPa Grade TRIP Steel to Body-in-White
<a href="#">2006-01-1587</a>	Analytical & Experimental Study of Component Level Crash Performance of DP 600 Steel
<a href="#">2006-01-1588</a>	Influence of AHSS Part Geometrical Features on Crash Behavior
<a href="#">2006-01-1589</a>	Sheared Edge Characterization of Steel Products used for Closure Panel Applications
