Active Safety and the Mobility Industry

New Book

AUTHOR: Dr. Andrew Brown, Jr.

Order No. PT-147

Safety is a key element in new vehicle design and active safety, together with driver distraction prevention, has become one of the most talked about issues in the mobility industry.

Active Safety and the Mobility Industry features 20 SAE technical papers, originally published in 2009 and 2010, which showcase how the mobility industry is considering all aspects of safety in designing and producing safer vehicles. These papers were selected by SAE International's 2010 President Dr. Andrew Brown Jr., Executive Director and Chief Technologist for Delphi Corporation.

The contents of this book explore a variety of safety issues in the areas of market and consumer preferences; driver assistance and modeling; active safety system, crash sensing and sensor fusion; communications; and road safety. The publication also includes a number of articles authored by renowned experts in the field of active safety.

Not only invaluable for those working in the field of automotive safety, *Active Safety and the Mobility Industry* will also be of interest to researchers and students, as well as those in government agencies tasked with defining and implementing public policies in the mobility safety arena.

Published By: SAE International, April 2011, 268 pages, Softbound

List \$201.00 (SAE-A member \$180.90 & SAE Joint member \$160.80)
