# MODERN ELECTRIC, HYBRID ELECTRIC & FUEL CELL VEHICLES FUNDAMENTALS, THEORY, AND DESIGN, 2<sup>ND</sup> Edition

AUTHOR(S): Mehrdad Ehsani, Ali Emadi, Yimin Gao

Order No. B-884

Air pollution, global warming, and the steady decrease in petroleum resources continue to stimulate interest in the development of safe, clean, and highly efficient transportation. Building on the foundation of the bestselling first edition, this second edition updates and expands its detailed coverage of the vehicle technologies that offer the most promising solutions to these issues affecting the automotive industry. Proven as a useful in-depth resource and comprehensive reference for modern automotive systems engineers, students, and researchers, this book speaks from the perspective of the overall drive train system and not just its individual components.

New Book

### New to the second edition:

- A case study appendix that breaks down the Toyota Prius hybrid system
- Corrections and updates of the material in the first edition
- Three new chapters on drive train design methodology and control principles
- A completely rewritten chapter on Fundamentals of Regenerative Braking

Published By: CRC Press, September 2010, 557 pages, Hardbound

List \$177.00 (SAE-A & SAE Joint member \$159.30)
